## **PECO Procurement: Spring 2010 Solicitation Results Rate Impact**

In the PECO Energy Default Service Plan settlement filing, which was approved by the Pennsylvania Public Utility Commission on April 16, 2009, parties agreed to the public release of certain information regarding the results of each solicitation 30 days after the solicitation (or 21 days before the supply period starts, whichever comes earlier). The Spring 2010 solicitation was held on May 24, 2010 for supply starting on January 1, 2011. The following information about the Spring 2010 solicitation, and the aggregate Full Requirements Small Commercial and Medium Commercial results from the Fall 2009 and Spring 2010 solicitations is provided in accordance with the PUC Order:

### **Full Requirements Products:**

#### **Spring 2010 Solicitation Results Residential Class**

Rate impact based on Spring 2010 results: **7.95 cents/kWh**, indicating a 1.8 percent decrease for the average residential customer beginning 2011.

#### **Fall 2009 and Spring 2010 Solicitation Results (aggregate results) Small Commercial Class**

Rate impact based on Fall 2009 and Spring 2010 results: **8.66 cents/kWh**, indicating a 10.6 percent decrease for the average small commercial customer beginning 2011

#### **Fall 2009 and Spring 2010 Solicitation Results (aggregate results) Medium Commercial Class**

Rate impact based on Fall 2009 and Spring 2010 results : **8.63 cents/kWh**, indicating a 5.1 percent decrease for the average medium commercial customer beginning 2011

#### **Spring 2010 Solicitation Results Large Commercial & Industrial Class**

Rate impact based on Spring 2010 results: **8.43 cents/kWh**, indicating a 7.4 percent increase for the average large commercial and industrial customer beginning 2011

Please see [Exhibit G](#) of the settlement, which explains the agreement of the parties regarding the public release of certain information regarding the results of each solicitation.
