The products and number of tranches available in this solicitation are provided in Table 3. A product for purposes of this RFP is defined by three characteristics: a) the Class to which it contributes Default Supply; b) the length of the supply period; and c) the date at which the supply period begins. For example, the RES-12-Jun24 product represents Default Supply for the RES Class for the supply period from June 1, 2024 through May 31, 2025.

I.3. Load Caps for Products Available

Each Class has “Load Caps”, which are limits on the number of tranches of Default Supply that an RFP Bidder can bid and serve for that Class. The Load Caps ensure that there will be a diversified pool of Default Suppliers for each Class. The Load Caps for a Class are set so that the Default Service customers of that Class have no more than a 50% exposure to any one Default Supplier at any given time. The Load Caps in this solicitation are provided here:
